25X1A

Copy 3 of 7

9 JUN 1962

MEMORANDUM FOR: HQ, USAF
AFCIG-5

SUBJECT : M11 Spec 25524A Fuel

1. In view of the recent thermal stability problems with M11 Spec 25524A Fuel, we must assume that all residual project fuel in storage at the locations listed below is unusable unless proven otherwise:

25X1A

5,015 gallons
11,385 gallons
7,520 gallons

2. It is requested that a sample of each batch stored at these locations be analyzed by the Wright-Patterson lab to determine the current status of the fuel. It is also requested that a representative sample be analyzed every 60 days thereafter until the fuel is either consumed or disposed of.

3. Please advise us if the fuel fails to meet military specifications. If disposal action is taken, we will inform you at such time as additional fuel is needed at these locations to support our mission requirements. No further pre-positioning is contemplated.

FOR THE DEPUTY DIRECTOR (RESEARCH)

(Signed) Stanley W. Beerli
